INSTALLATION, DATA CONVERSION AND TRAINING

- Installation, data conversion and training are services for which Gallery Systems bills separately.
- Gallery Systems will provide an estimate for any data conversion, based on analysis of existing records and database structure.
- The training package includes one day of System Administration and Configuration Training.
- Training class size is limited to 10 people. The small size of the group ensures that the client receives individual attention from the instructor. Alternatively, it is possible to "train-the-trainer" in order to reduce costs. Training time may be purchased in advance, and used as needed.
- Incidental expenses, such as travel and overnight accommodations are not included in the day rate. Expenses are pre-approved, and invoiced as incurred.

COURSE	RATE PER DAY
