

TMS Media Studio

A DAMS MADE FOR COLLECTIONS

POWERFUL MEDIA WORKFLOWS

TMS Media Studio

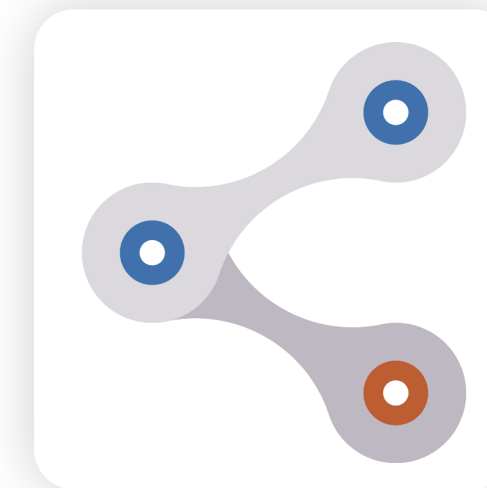

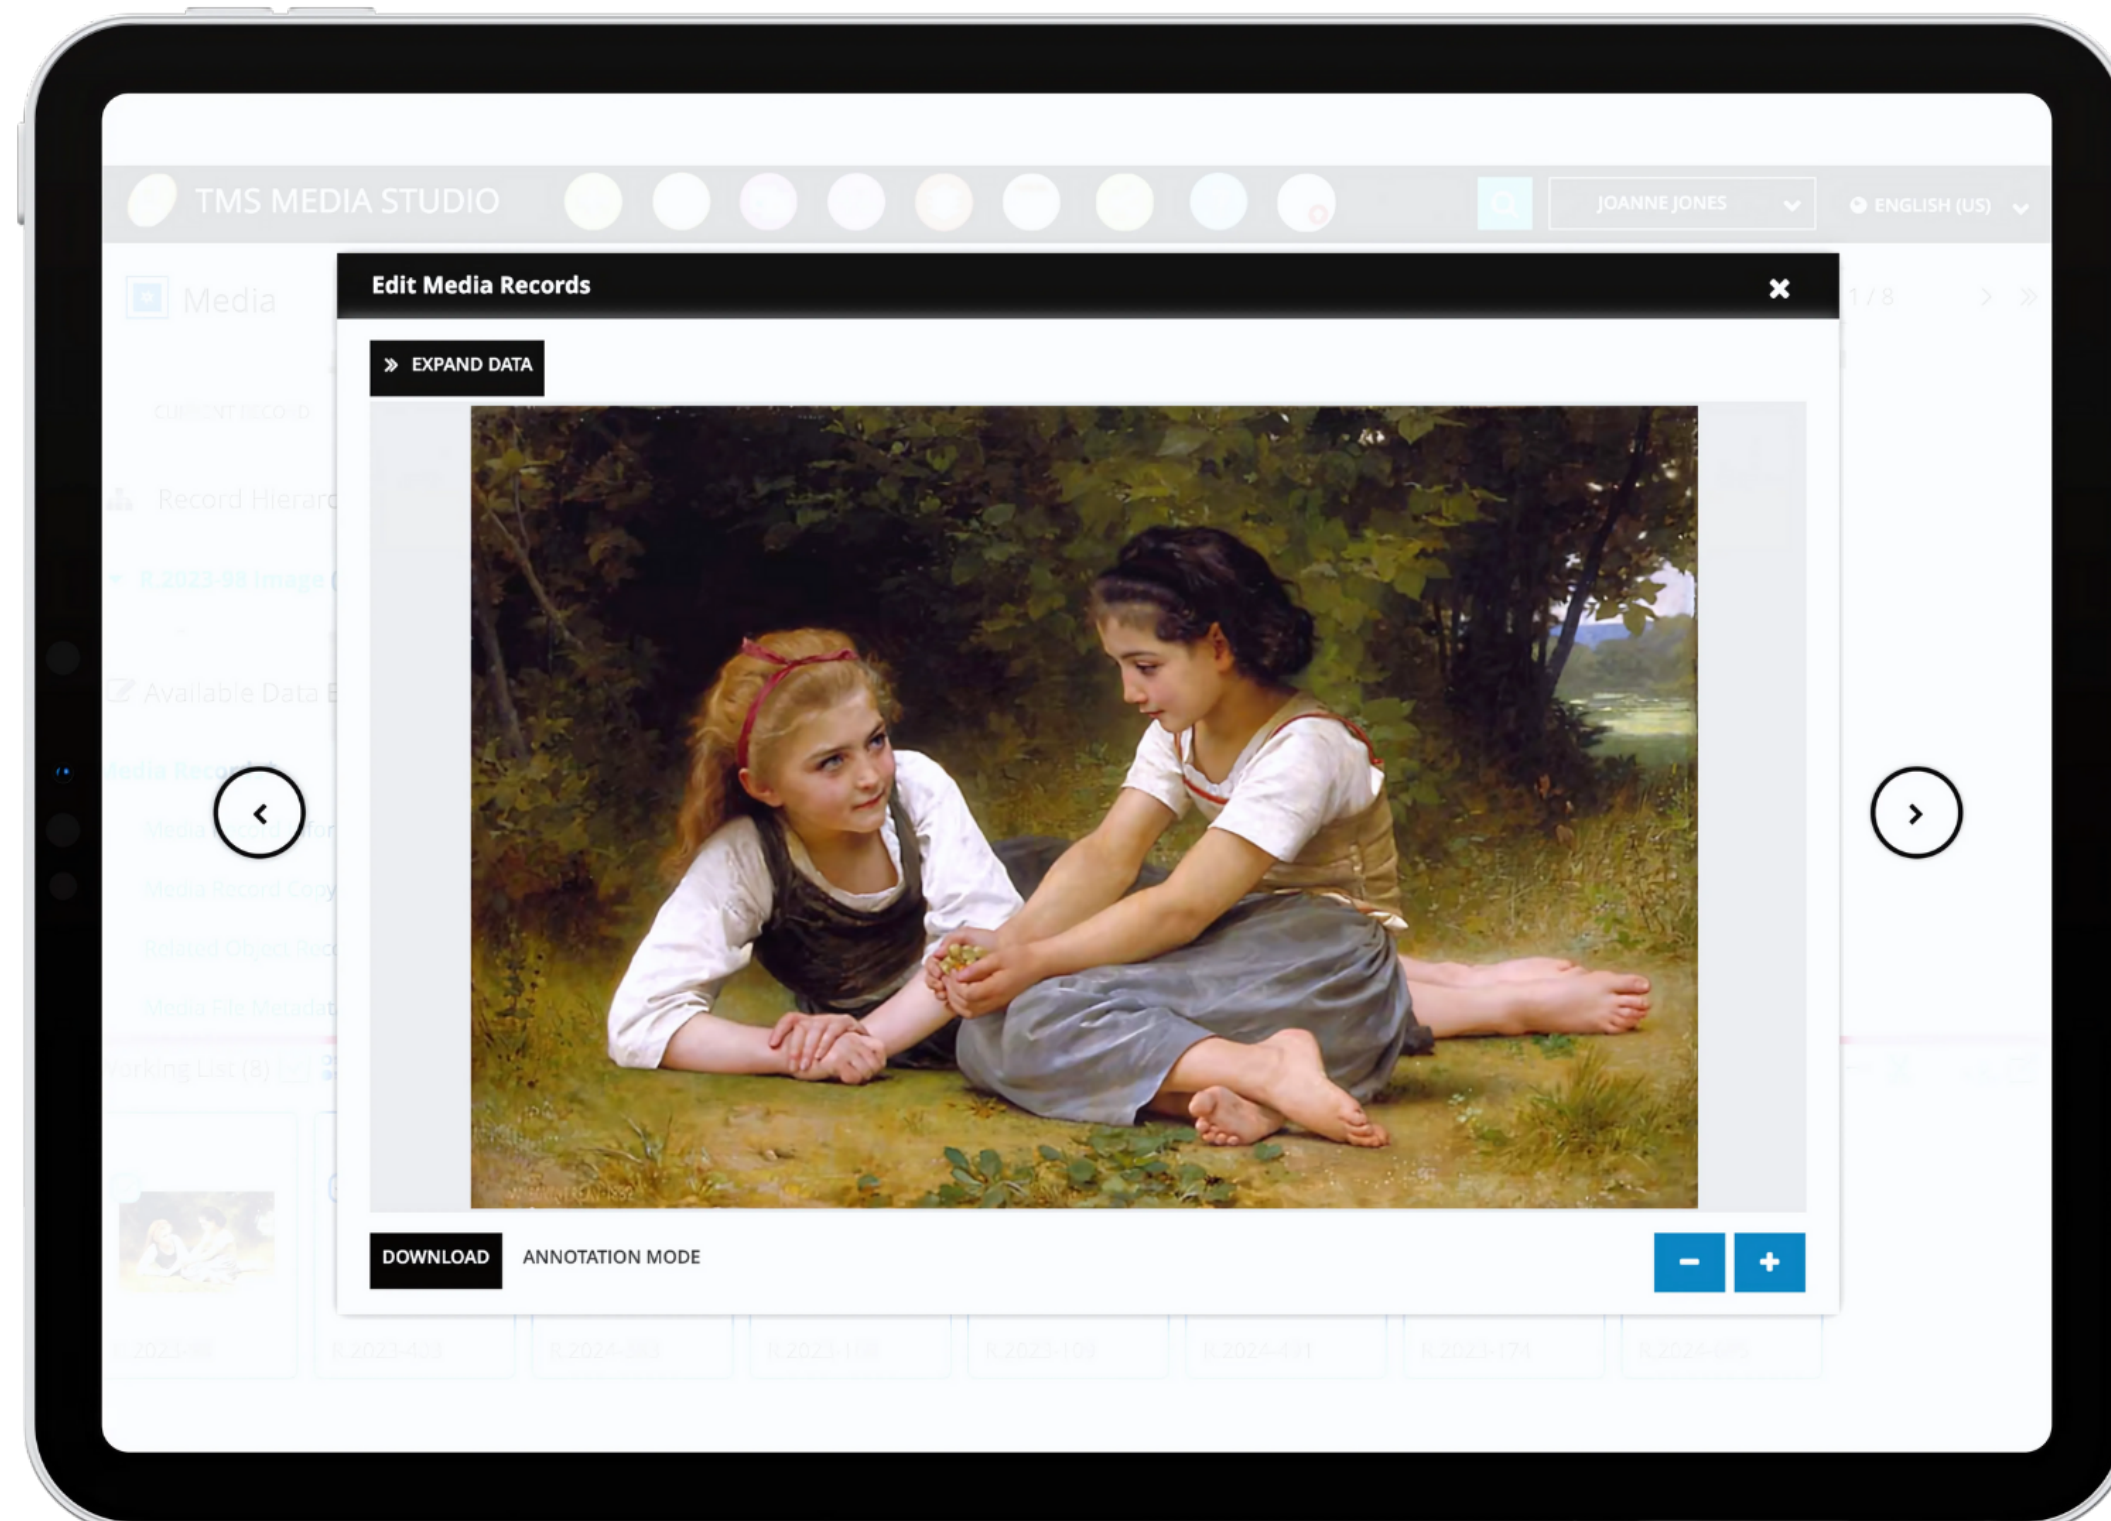

TMS Media Studio is a digital asset management system (DAMS) tailored specifically for collections. Intuitive and powerful, this web-based platform streamlines your institution's media workflows, from collections care to exhibition planning.

With advanced rights management tools and seamless integration with marketing and publications, TMS Media Studio streamlines your institution's operations for greater efficiency.

AN INTEGRATED SOLUTION

TMS Media Studio

Seamless Integration with TMS Collections

TMS Media Studio shares its database with TMS Collections, ensuring a smooth workflow between digital assets and collections data. Updates made in either system are instantly reflected in the other, keeping your data accurate and up-to-date without duplicate entry.

No Third-Party Integration Required

TMS Media Studio eliminates the need for third-party DAMS, saving you time, money, and IT resources. With no external integrations to maintain, you'll avoid potential system disruptions and reduce ongoing maintenance costs.

Who benefits from TMS Media Studio?

With most departments using digital assets, the answer is almost everyone.

Collections Care and Conservation

Leverage a DAMS
and CMS made to
work together.

Database and Digital Asset teams

Support the intake
and management of
digital assets.

Marketing, Publications, Education

Make media
available to public-
facing departments.

FEATURES

ACCELERATE YOUR WORKFLOW WITH TIME-SAVING MEDIA MANAGEMENT

Streamline how you catalog, organize, and update your media assets with tools designed to maximize efficiency and reduce manual effort.

Superior Media Importing: Speed up cataloguing with batch imports or add files individually using drag-and-drop functionality.

Easy Asset Management: Effortlessly move, clean up, and organize media assets within TMS Media Studio.

Save and Share Packages: Create and share packages of digital assets, arranging them in your preferred order for easy use in publications and exhibitions.

Batch Update Functionality: Save time by updating multiple records at once, moving them between folders, and automatically updating authorities and paths.

TMS Media Studio

ACCESS YOUR MEDIA FROM ANYWHERE, ANYTIME

Work without boundaries through a secure, web-based platform that keeps your media assets and records at your fingertips—no matter where you are.

Web-based Interface: Securely access your media records and digital assets from anywhere with TMS Media Studio, a web-based DAMS.

Powerful Data Linking: Seamlessly link media assets to records across all TMS Collections modules, ensuring comprehensive data integration.

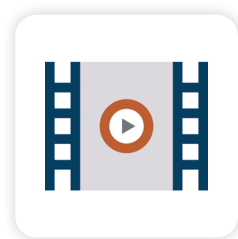

FEATURES

TMS Media Studio

STREAMLINE OPERATIONS ACROSS YOUR INSTITUTION

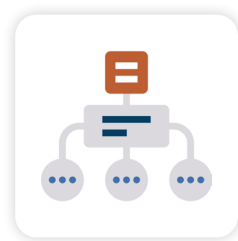

Simplify complex workflows, improve visibility, and manage tasks more efficiently with tools that support daily operations and long-term projects.

Video and Audio Previews: Preview audio and video files directly within the platform, with customizable settings.

Image Annotation: Annotate images with integrated markup tools, preserving original files while saving annotations as separate assets.

Custom Workflows: Use the Project Module to manage media-based projects, special workflows, and collections, streamlining tasks like photography requests, exhibition approvals, and more.

Robust Searching: Find exactly what you need with simple and advanced search options, filtering by keyword, description, media record number, and more.

PROTECT YOUR MEDIA WITH BUILT-IN SAFEGUARDS

Ensure your digital assets are secure, properly managed, and rights-protected with robust tools designed for compliance and control.

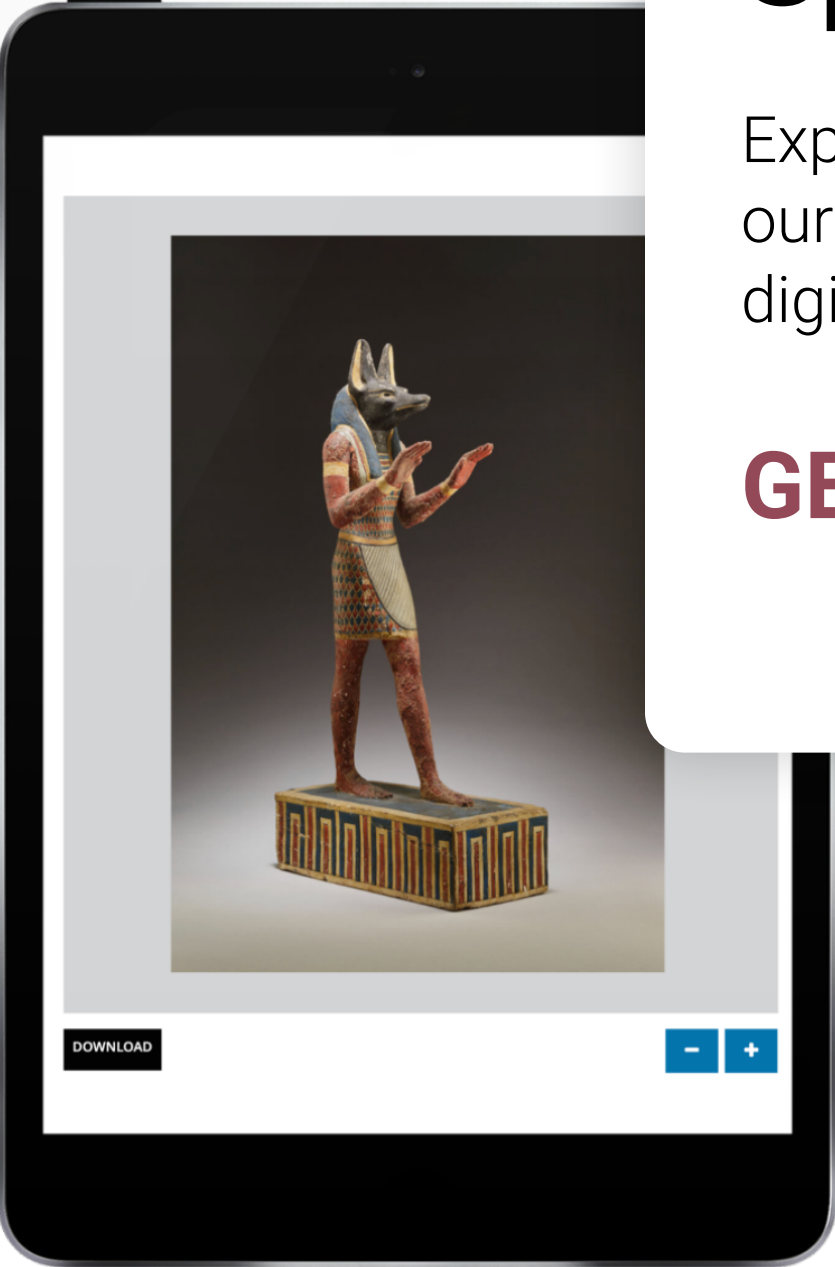

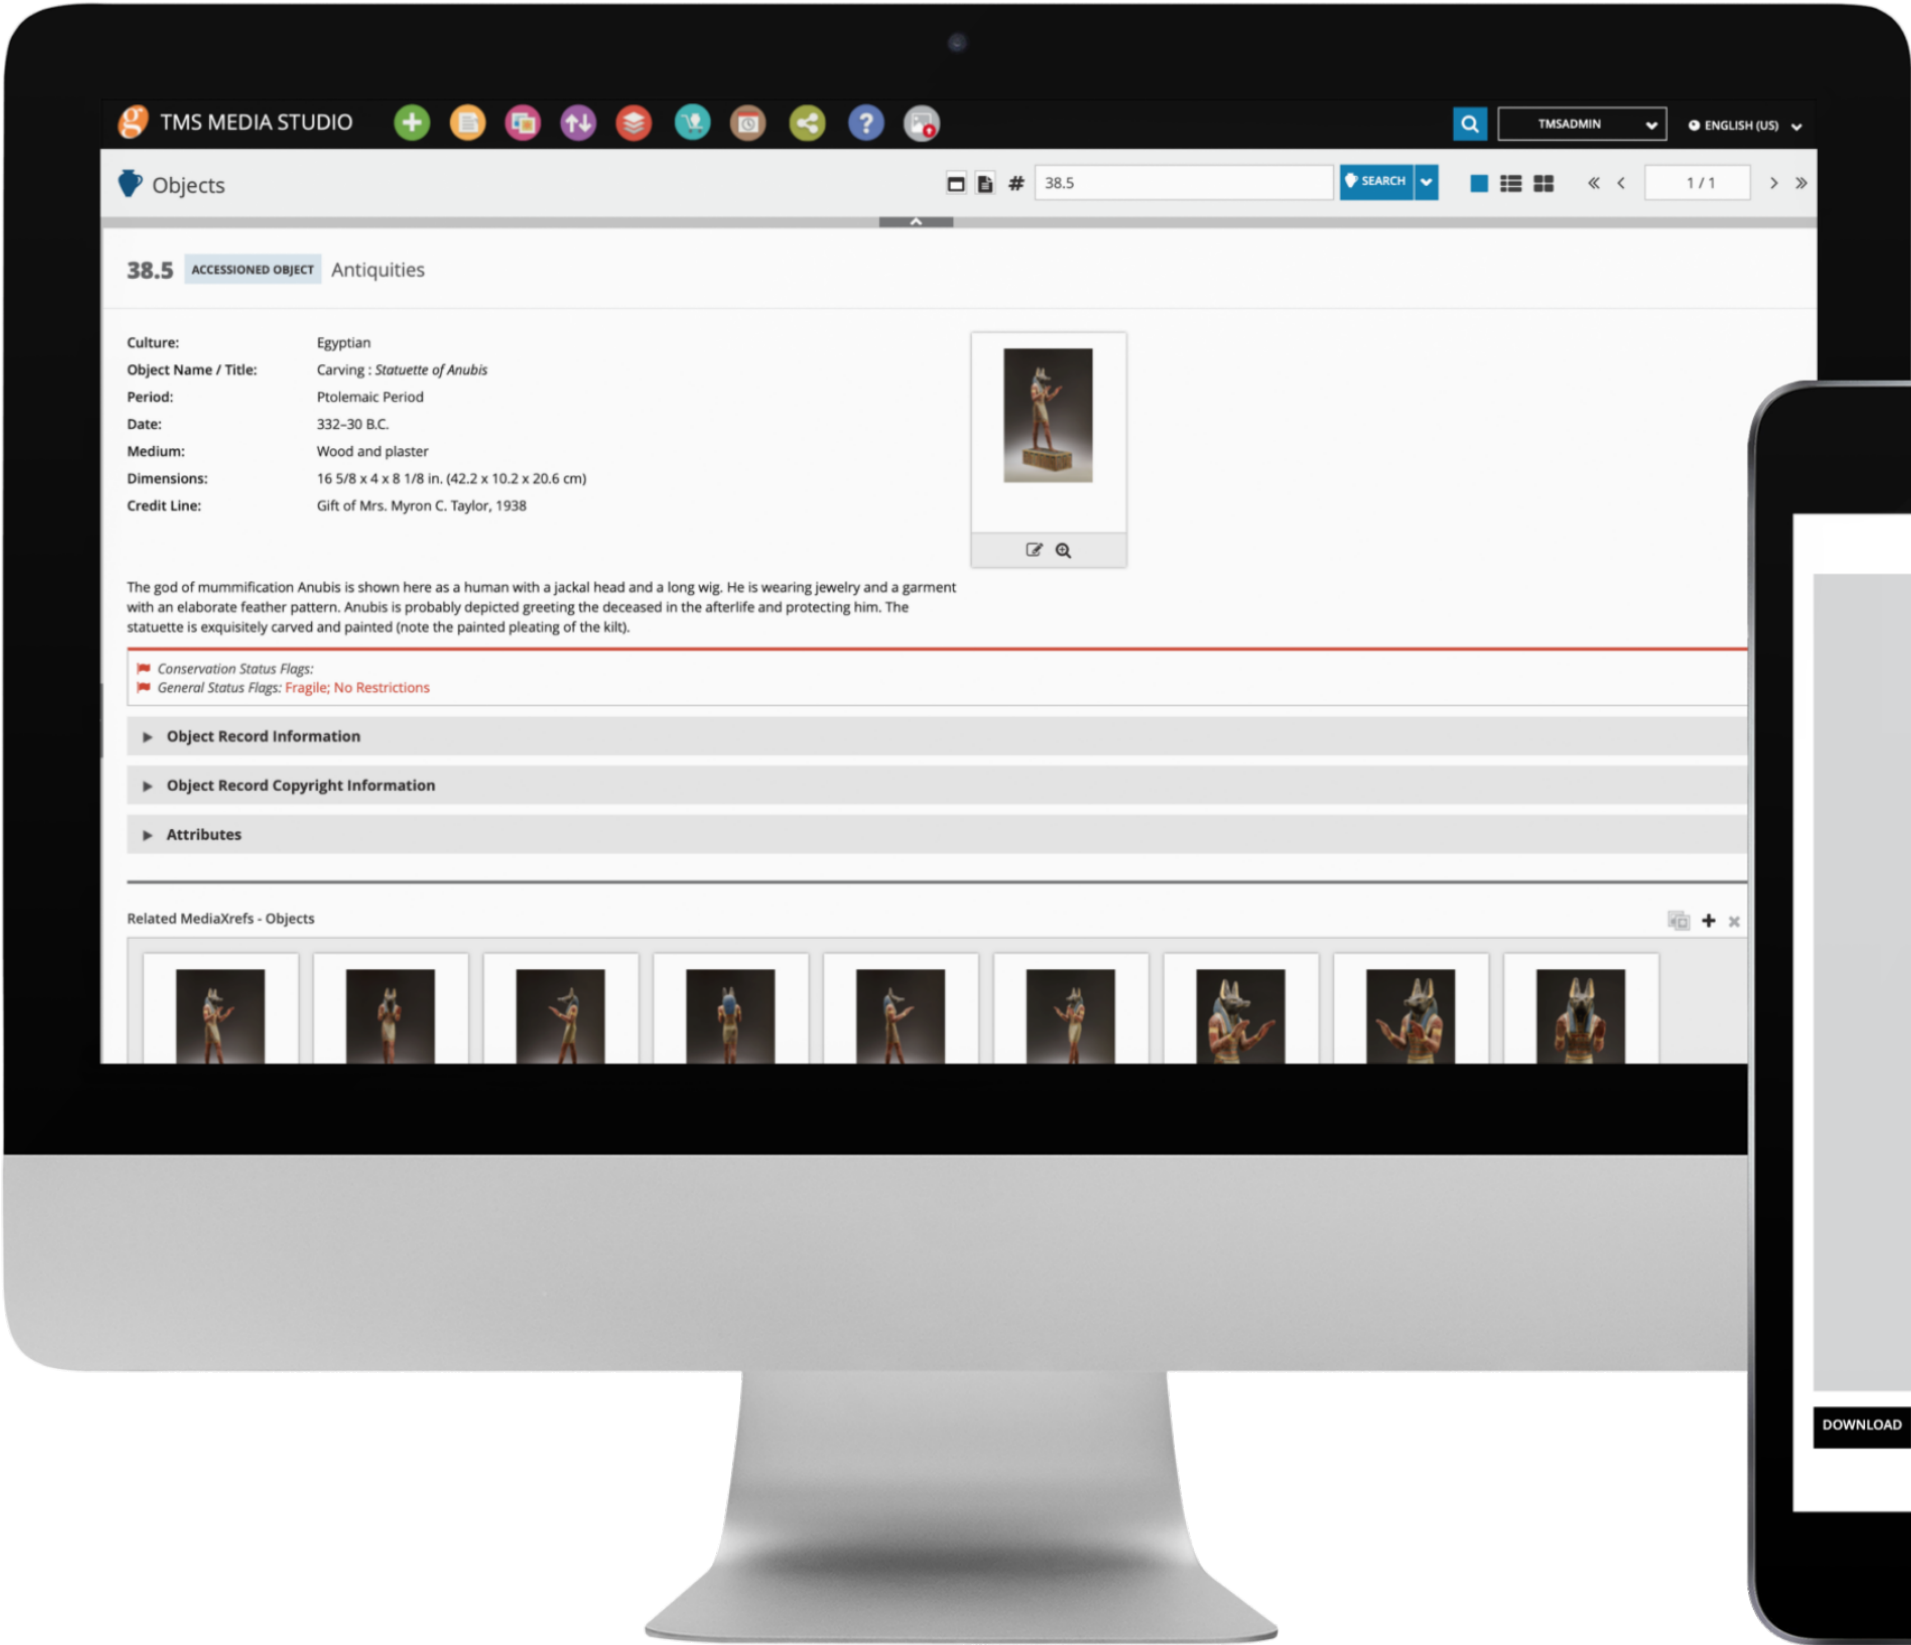

Ironclad Security: Protect your media assets with role-based access control, granting and restricting access as needed.

Rights and Reproductions Management: Manage rights and reproductions in one place, with real-time updates reflected in your CMS database.
